Education

National Institute of Technology, Rourkela — B.Tech (Civil) CGPA: 7.1/10	2021–2025
RPS College, Patna — Class 12 (BSEB) Percentage: 75%	2017–2019
St. Paul's School, Patna — Class 10 (CBSE) Percentage: 92%	2016–2017

Experience

TechnocolabsSoftware — AI Site Builder – MERN Agentic AI	May 2025 – July 2025
- Developed an AI-powered website builder that generates, edits, previews, and deploys websites using conversational prompts. - Implemented real-time website creation using natural language processing, eliminating the need for coding. - Built dynamic features including live preview, version control, rollback functionality, and AI-driven content generation. - modern full stack technologies with Agentic AI workflows to deliver responsive and production-ready websites.	
credora — Automated web App Cloning Agent	Jan 2026 – Mar 2026
- Built an agentic automation system using Playwright to replicate web UIs by extracting DOM structure, screenshots, and computed CSS. - Developed a pixel-perfect clone of Asana (Home/Projects/Tasks) using React, Vite, and Tailwind CSS. - Implemented visual regression testing and multi-browser snapshot comparison to ensure UI accuracy. - Built a full-stack system with FastAPI, PostgreSQL, and SQLAlchemy enabling end-to-end agent → frontend → backend workflow.	

Projects

Self-Driving Loan Onboarding Agent React, Vite, JavaScript
- Developed an AI-powered Loan Onboarding Agent using React and Vite with a real-time chat-driven workflow. - Implemented document validation and cross-checking to identify data mismatches during onboarding. - Built a no-hallucination system that displays missing information transparently and supports user edits.
SalesDuo Listing Optimizer (FastAPI, React, MySQL, LLM)
- Developed a full-stack application using FastAPI, React, and MySQL to retrieve Amazon product data via ASIN. - Integrated LLM-based optimization to generate improved titles, bullet points, descriptions, and keywords. - Implemented comparison of original vs AI-generated listings to enhance SEO quality and product visibility.
AI Guest Messaging Automation Platform FastAPI, PostgreSQL, Claude AI
- Developed an AI-powered backend for automated guest messaging across multiple booking platforms. - Implemented query classification, draft response generation, and confidence scoring workflows. - Integrated PostgreSQL for interaction tracking, auditing, and escalation management.

Technical Skills

Programming & Development: Python, JavaScript, C++, SQL, React.js, Node.js, Express.js, FastAPI, REST APIs
AI/ML & Data: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, LLMs, RAG, LangChain, PySpark
Databases & Tools: PostgreSQL, MongoDB, ETL Pipelines, AWS, Docker, Git, Streamlit, Vercel, Render

Certificates

Leetcode | GeekforGeek | Hack Vega | Coding Ninjas | Qualcomm | Devtown | Naukari campus | AI

Achievements

- Solved 300+ DSA problems on LeetCode and 300+ problems on GeeksforGeeks.
